https://www.linkedin.com/in/arooj-saleem/ | https://github.com/AroojSaleem-995

PROFESSIONAL SUMMARY

Software Engineering student with hands-on experience in deep learning, AI-powered applications, backend development, IoT systems and REST APIs. Skilled in Python, Node.js, React Native FastAPI, SQL, and ML model integration with practical experience building AI applications, RAG solutions, and data-driven solutions.

EDUCATION

Bachelors in Software Engineering
Fatima Jinnah Women University, Rawalpindi | CGPA: 3.60/4.0 *Expected July 2027*

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, SQL, HTML, CSS, C, C++, React Native
Backend: Node.js, Express.js, Spring Boot, Flask, RESTful APIs
Frontend: HTML, CSS, JavaScript, Tailwind CSS
Database: MySQL, SQL Server
IoT & Hardware: ESP32 Firmware, Motor Control, GPS Integration, IP Camera Integration
Cloud & DevOps: AWS (EC2, S3), Git, GitHub
Deep Learning & AI: Scikit-learn, Pandas, NumPy, Matplotlib, Streamlit, LangChain, Sentence Transformers

PROFESSIONAL EXPERIENCE

Artificial Intelligence Intern | Neuron Technologies
Remote *Aug 2026 – Present*
Engineered backend architecture, ESP32 firmware, and MQTT protocols for an AI-powered food delivery robot.
Integrated motor control, GPS functionality, and IP camera feeds to enable real-time hardware-software synchronization

Machine Learning Engineering Intern | FlyRank AI
Remote *Jul 2026 – Sep 2026*
Applied machine learning concepts through data wrangling, vector embeddings, clustering, and intent modeling.
Developed and delivered the accepted “Google Search Ranking & Discoverability Capstone” project.

C++ Programming Intern | CodeAlpha *1st May 2025 - 30th May 2025*
Remote
Developed structured C++ applications to solve complex algorithmic problems using core object-oriented programming principles.
Implemented clean logic and efficient data structures across multi-module software components.

PROJECTS

Loan Approval Prediction System | GitHub *April 2026 - Present*
Python, Scikit-learn, Streamlit, Machine Learning

Built ML-based loan approval prediction system using classification models, preprocessing, model evaluation, and hyperparameter tuning. Deployed the trained model using Streamlit for real-time predictions.

Smart Product Recommendation & Price Tracking System | GitHub *Nov 2025 - Jan 2026*
Python, FastAPI, Machine Learning, Sentence Transformers, WebSocket, Amazon Dataset

Built full-stack multi-agent recommendation system achieving 88.24% accuracy using Sentence Transformer embeddings and TF-IDF with WebSocket real-time price drop notifications.

Retrieval-Augmented Generation (RAG) System | GitHub *Jan 2025 - Feb 2025*
Python, LangChain, Vector Database, OpenAI API

Designed and implemented a retrieval-augmented generation system combining document retrieval with large language models to generate grounded, context-aware responses with practical AI integration focus.

CERTIFICATIONS & ACHIEVEMENTS

Google AI Essentials Specialization - Google (Oct 2025)
Google Prompting Essentials Specialization - Google (Oct 2025)
National AI Training Bootcamp - Ministry of IT & Telecom, Indus AI Week (Feb 2026)
Women Empowerment in AI - MLSA Women Tech Hub (March 2024) | Collaboration with Fatima Jinnah Women University
